We Provide Trusted & High Quality Medical Devices

"Redefining Healthcare through Technology"

DIVISION OF BRAWN GROUP

SBRG MedTech Pvt. Ltd. is one of the fastest-growing manufacturer of medical devices. We focus on innovation, quality, and global standards to deliver safe, reliable, and easy-to-use healthcare solutions. Our goal is to support healthcare professionals and improve patient care worldwide.

Our Global Offices

- Bolivia
- Dubai
- Panama
- Philippines
- Uzbekistan
- Vietnam
- Sri Lanka
- Guatemala
- Texas, USA
- Netherland

Mission

"To be a trusted innovator in accessible, advanced and reliable medical devices, advancing patient safety and empowering healthcare worldwide."

Vision

"To design, develop and manufacture affordable, high-quality medical consumables, leveraging technology, innovation and compliance to enhance patient care and safety across global healthcare systems."

Safety IV Cannula With Extension Tube

Closed intravenous (IV) catheters represent an advancement in vascular access technology, incorporating features designed to improve patient safety, reduce complications, and streamline healthcare procedures. These systems are designed to minimize risks for both patients and healthcare professionals.

Flexible Wings

Swabbable Needle Free Connector

Pinch Clamp

Features

- Automatically shields the needle and uses a closed system to reduce blood exposure, minimizing needlestick injuries and risk of pathogen transmission.
- Pre-assembled design combines IV catheter, extension set, stabilization device, and needle-free connectors—reducing site manipulation, minimizing complications, and lowering the risk of needle stick injuries and bloodstream infections.
- Polyurethane construction ensures optimal hardness for smooth insertion and softens in the vessel for patient comfort. Closed systems allows longer dwell times, reducing frequent catheter replacements.

Safety IV Cannula with injection port & with wings

Vascular Access

Ergonomically designed wings

Transparent flashback chamber

Cross Clip needle safety guard

Features

- Extra-Sharp Back Cut bevel :- Universal back cut bevel smoothly inserts into vein with minimal puncture trauma.
- Radio Opaque catheter:- Soft catheter feels comfortable for the patient and increases catheter dwell time.
- Radio opaque property of catheter is good for X-ray visibility.
- Wings provides good stability and inclination angle of catheter to reduce stability related complications.
- Injection Port:- Allows extra passage for quick injection without interruption of main infusion line
- Needle Hub:- Ergonomic design of needle hub for better thumb support during venipuncture.
- Safety clip:- Passive safety clip helps prevent accidental needlestick injuries.
- Flashback Chamber:- Transparent chamber to ensure quick visualization.

SAFETY IV CANNULA WITHOUT INJECTION PORT & WITHOUT WINGS

Safety IV Cannula without injection port & without wings

Safety I.V. Cannula without injection port and wings is designed with Passive full automatic safety feature which covers the tip of the needle completely after use, hence protecting healthcare workers against the risk of needle stick injuries and related infections.

Needle Safety Guard

	Size	Catheter O.D mm	Catheter Length (mm)	Flow Rate (ml /min)	Product Code
18G	Green	1.3	32	90	01011318XX
18G	Green	1.3	45	90	01011118XX

22G	Blue	0.9	25	36	01011422XX
24G	Yellow	0.7	19	23	01011524XX

Features

- Catheter tip is designed for a smooth cannulation experience, Radiopaque Stripes are also present for easy detection of catheter presence under X-Ray.
- Self-activation tip cover technology for protection against needle stick injuries.
- Universal triple beveled back cut needle, which offers lower resistance during insertion, resulting in minimum trauma.
- Gauge wise color coded body as per international standards.
- Quick Flashback confirms successful cannulation.
- DEHP / LATEX - FREE.

Extension Tube with Needle Free Connector

Infusion Therapy

Neutral displacement **Needle-Free Connectors** (NFCs) are designed to minimize both positive and negative pressure changes within the catheter lumen during the connection and disconnection of syringes or IV sets. This characteristic is intended to reduce blood reflux into the catheter tip, a factor that can contribute to catheter occlusion and potentially increase the risk of catheter-related bloodstream infections (CRBSIs).

Example : 01070101XX ➔ XX Refer to Packaging	
Type of Packaging	Packaging Code
Paper Pouch	07

Size	Mono	Duo	Trio	Quatro	Penta
Product Code	01070101XX	01070102XX	01070103XX	01070104XX	01070105XX

Features

- Neutral displacement design prevents blood reflux on disconnection, maintaining catheter patency and reducing the risk of occlusion.
- Closed system prevents microbial entry, with a smooth disinfectable surface and transparent housing—helping to identify any residual blood or debris that could serve as a site for bacterial growth and biofilm formation.
- Straight fluid path with minimal dead space promotes laminar flow, ensures effective flushing, and reduces residual fluid—minimizing areas for biofilm development and formation
- Neutral displacement NFCs simplify nursing practice and reduce the risk of clamping errors.

T-WAY®

Three Way Stop Cock as an Accessory to Perfusion Sets

It is designed for multiple infusion of medicine, fluids and blood components to patient

Features

- Smooth handle rotation ensures easy alignment of fluid pathway.
- Fully validated and can sustain pressure up to 6 bar.
- Fully transparent material allows clear visualization of fluid / medicine.
- Compatibility with other standard accessories.
- Compatible with Lipid based drugs.
- 360° rotation.
- DEHP / PVC / LATEX – FREE.

VSET STOP PROTEKT™

Intravenous Infusion Set (I.V Set with Auto Air Stop & Priming Filter)

Infusion Therapy

Auto Air Stop Filter

Priming Filter

Features

- Clear spike compatible with I.V. bottles.
- Uniquely designed ring in drip chamber for secure gripping.
- Flexible drip chamber for easy and fast priming (Drop rate 20 drops/mL).
- DEHP-Free reduces phthalate related toxicity thus ensures Patient Safety.
- Suitable for Gravity feed as well as Pressure Infusions up to 2 bars.
- Standard tube length: 180 cm.
- Latex-Free.
- Also available with “Y” injection port (latex free), Back check valve, Needle free Y-site & Stop cock.

VSET STOP PROTEKT BCV™

IV Set with BCV, Needle Free Connector & Rotating Luer Lock

It is a sterile, single-use medical device designed for the safe and efficient administration of intravenous fluids and medications to patients. This IV set incorporates advanced safety and convenience features to ensure accurate fluid delivery while minimizing the risk of contamination and backflow.

Back Check Valve

Needle Free Connector

Features

- Back Check Valve (BCV): Prevents fluid backflow and helps reduce the risk of contamination.
- Rotating Luer Lock: Provides secure and flexible connection, preventing kinks and disconnections.
- Air Vent with Filter (if applicable): Ensures smooth fluid flow in rigid containers by allowing air entry without contamination.
- PVC Tube: Flexible and transparent main tube that serves as the central passageway for fluid into the patient's circulatory system, with all supporting parts attached. The tube is DEHP-Free.
- Needle Free Connector: Allows drugs or fluids to be injected or aspirated without a sharp needle using self-sealing valves, reducing the risk of accidental needle stick injuries to healthcare workers.
- The tube length is 1500mm, providing sufficient length for smooth administration.

IV SET WITH BCV, 0.2 MICRON FILTER

IV Set with BCV, 0.2 Micron Filter,
2 Injection Site & Rotating Luer Lock

Infusion Therapy

An IV Set with BCV, 0.2 μ m Filter, 2 Injection Sites & Rotating Luer Lock ensures safe, contamination-free infusion with bacterial control, fine filtration, and multi-drug access. It provides secure connection, smooth handling and enhanced patient safety during critical infusions.

Back Check Valve

Y Connector

0.2 Micron Filter

Features

- Back Check Valve (BCV): Prevents fluid backflow and reduces the risk of contamination during infusion.
- 0.2 Micron Filter: Removes bacteria and particulates to ensure safe and sterile fluid delivery.
- 2 Injection Sites: Allow for convenient, multi-drug administration without interrupting the primary line.
- Rotating Luer Lock: Provides a secure and flexible connection, preventing kinks and disconnections.
- Air Vent with Filter (if applicable): Ensures smooth fluid flow in rigid containers by allowing air entry without contamination.
- Transparent Drip Chamber: Enables easy monitoring of flow rate and air bubbles.
- Latex-Free & DEHP-Free Material: Made from medical-grade, non-toxic materials to ensure patient safety.
- Also available with needle free connector.

VSET STOP®

IV Set Photosensitive Vented/ Non-Vented/ Y-Site Connector

A photosensitive infusion set is an IV set with light-protective tubing used to deliver drugs that degrade when exposed to light, ensuring the safety, efficacy, and potency of the medication until it enters the patient's bloodstream.

Y Connector

Roller Clamp

Features

- Amber/Opaque Tubing – Protects medications from harmful UV and visible light.
- Light Protection – Maintains potency of photosensitive drugs during infusion.
- Optional Air Vent – Vented for glass bottles; non-vented for plastic IV bags.
- Sterile & DEHP-Free – Ensures safety with non-toxic Material
- Y-site connector (optional for multiple drug delivery)
- Drip chamber (vented/non-vented as per use).
- Roller clamp for precise flow control.
- Sharp spike for easy puncture.
- Available Size - 21G

Type	Vented	Non-Vented
Product Code	01020701XX	01020702XX

IV Flow Regulator

Infusion Therapy

IV Flow Regulator extension set to regulate the flow of IV fluid from an infusion set into an I.V catheter.

Features

- Super smooth kink resistance tubing ensures uniform flow rate.
- Designed to control flow rate from 5mL/hr - 250mL/hr manually.
- Option available with "Y" connector injection site for extra medication without disturbing the main line.
- Universal Male and female luer lock makes it compatible with other devices.
- Available with DEHP-Free material, LATEX-Free.

Measured Volume Set

Infusion Therapy

A burette set is specially design to deliver a fixed volume of IV fluid at fixed rate, usually with added medication.

Y Connector

Roller Clamp

OPTIONS AVAILABLE

- Capacity : 100ml, 110ml & 150ml
- Drop Rate : 60 drops/ml

Example : 01060103XX ➡ XX Refer to Packaging

Type of Packaging	Packaging Code
Ribbon Pouch	06
Paper Pouch	07

Features

- Specialized measured volume set made up of DEHP-Free material.
- Equipped with a micro drip with reduced drop size of 60 drops per ml.
- Provided with a burette type chamber of 100 mL capacity with 10 mL overflow limit.
- Burette chamber is made of bio-compatible medical grade transparent styrene polymer, suitable for infusing all types of fluids.
- Unique floating auto shut off valve acts as a floating indicator and automatically shuts off the drain path to prevent the passage of air in the line.
- No-kink device prevents kinking of tube during transportation and transfers.
- Separate plugs for extra medication and change over.
- Sterile, individually packed.
- Available in Y site and needle free connector.

SB BLOOD FLOW SET™

Blood Transfusion Set/with Rotating Luer Lock without Needle/with Y Connector

Transfusion System

Y Connector

Features

- Sharp non-vented spike suitable for blood bags and all type of standard blood containers.
- Provided with a cylindrical drip chamber with 200 filter to prevent passage of any blood clots, down the path.
- Flash ball type injection port for extra medication.
- Comes with smooth 150 cm long, kink resistant tube.
- Efficient roller controller for accurate adjustment of transfusion rate.
- Sterile, individually packed.

URINE COLLECTION BAG with Sampling Port

Urine Collection Bag with Sampling Port

A sterile, high-quality Urine Collection Bag with Measured Volume Meter designed for safe urine drainage, storage, and sampling. It features a sampling port for hygienic specimen collection and a T-type bottom outlet valve for easy and controlled emptying.

Sampling Port

T type Bottom outlet

Features

- Integrated sampling port for quick, contamination-free specimen collection.
- T-type bottom outlet valve for convenient, spill-free drainage.
- Anti-reflux valve to prevent backflow and reduce infection risk.
- Medical-grade transparent PVC with clear volume markings.
- Capacity: Available in 2000 mL.
- Universal catheter connector and reinforced hanger slots for secure positioning.

THREE WAY	
Size in FR	16, 18, 20, 24, 26
Balloon Capacity	30ml & 30-50ml
Length	Approx. 40 cm

PEDIATRIC CATHETER		
Size in FR	6	8-10
Balloon Capacity	1.5ml	3-5ml
Length	Approx. 30cm	

Features

- Non-toxic, bio-compatible and extra smooth for maximum patient comfort.
- Symmetrical balloon, rounded sealed tip and hard non-return.
- Soft and uniformly inflated balloon makes the tube sit well against the bladder.
- Smooth round shaft can minimize trauma during insertion and withdrawal.
- Comes as 2-way or 3-way design. 3-way design helps in irrigation of bladder and sometimes for therapeutic instillation.
- Colour coded for easy identification.

Features

- Nelaton catheters are used for short term bladder catheterization.
- Manufactured from non-toxic, non-irritant medical grade PVC compatible with catheter lubricants.
- Frozen surface tubing for super smooth intubation.
- The presence of radio opaque line throughout the catheter tube.
- The distal end is coned for non-traumatic introduction with two lateral eyes for efficient drainage.
- The proximal end is fitted with universal funnel shaped connector for extension.
- Funnel shape connectors are color coded for instant identification of sizes.
- Straight packed in peelable soft blister pack.
- Sterile, ready for use.

SUCTION CATHETER

Suction Tip and Catheter

Respiratory Care

Suction Catheters Critically ill or injured patients who require breathing (endotracheal) tube or tracheostomy tube need occasional suctioning to remove secretions from the airway.

HME FILTER

Heat and Moisture Exchange Filter

Respiratory Care

HME Filters used to maintain passively heat and moisturizer levels of air prevent any bacteria or viruses from entering the patient's airways.

Features

- Provides effective protection against various types of particles including bacteria, viruses, and moisture droplets.
- Precisely engineered and easy to use device made up of high strength plastic material offering reliable performance.
- Provided with high efficiency electrostatic filters to address concerns associated with ventilated patients.
- The filters help protect the patient, the equipment, and the breathing circuit from contamination.
- HME Filters are designed according to "ISO" standards to help facilitate connection to different ventilators and anesthesia systems.
- A conveniently located port or connection permits gas sampling at the top of the housing,
- Enhances particle capture efficiency and give a low and stable breathing resistance even when wet.

INFANT FEEDING TUBE

Feeding Tube

It is used to feed a person who is unable to eat or drink. A person may need a feeding tube due to difficulty swallowing, an eating disorder, or other feeding issues.

Features

- Smooth close distal end with two lateral eyes.
- Universal Female mount.
- High quality Bio-compatible material.
- Kink resistant PVC tubing with Radio-opaque line.
- Available length 40, 50 & 100 cm.
- Size :- 4 FG to 10 FG.
- DEHP free material.
